Prescribed Fire Operations Update

John Day, Prairie City and Hines, OR. – (June 11, 2021) After carefully monitoring conditions across the Forest, fire officials have determined that conditions are within specific parameters, including temperature, relative humidity, and fuel moisture to start prescribed fire operations in specifically planned units.

- Blue Mountain Ranger District– will be conducting rookie/guard school training fire today. It will be conducted between 1000 and 1630 today and will be no more than one acre in size. They will be utilizing a small portion of Starr Unit 22 on the NW corner of Bear Valley for this exercise.
- Emigrant Creek Ranger District – No burning over the upcoming weekend. The district will assess an additional 200 acres in Silvies 7 to burn next week, once the temperature and relative humidity come into prescription.
- Prairie City Ranger District –The district will consider burning 1-3 acres in Merit 8 for Prairie City's guard school/rookie training just west of Logan Valley the week of June 14.

For the safety of firefighters and the public, roads and areas of prescribed fire activity will be signed. Please avoid these areas so as not to interfere with ongoing operations. For safety, roads, trails and areas may need to close temporarily as firefighter operations are taking place. Smoky conditions may also reduce visibility to a level that would require additional temporary closures. During prescribed fire operations, there is potential for impacts to camping and hunting. Hunters are advised to plan ahead, for their safety they should not camp in or near an area of prescribed fire activity.

Spring operations reduce surface fuels, increase height of some canopy, reduce small tree densities, and help promote fire resilient trees, thereby improving our ability to protect communities from wildfire. Additionally, these prescribed fires improve wildlife habitat, promote long-term ecosystem integrity and sustainability by reducing the risk of high-severity wildland fire.

All prescribed burn activity is weather and condition dependent.

With the potential for smoke to settle in certain areas during active operations, the public can monitor the smoke and air quality in our area and across the state by visiting, <http://oregonsmoke.blogspot.com/>.

Additional information regarding prescribed burning on the Malheur National Forest is available on InciWeb at <https://inciweb.nwcg.gov/incident/7426/> or by viewing the Prescribed Fire Activity interactive map at [USFS R6 Tri-Forest Prescribed Fire Map](#).
