

Smoke Outlook for 9/19 - 9/20
Northern California River Complex and Antelope Fire
 Issued at: 2021-09-19 06:39 PDT

Fire

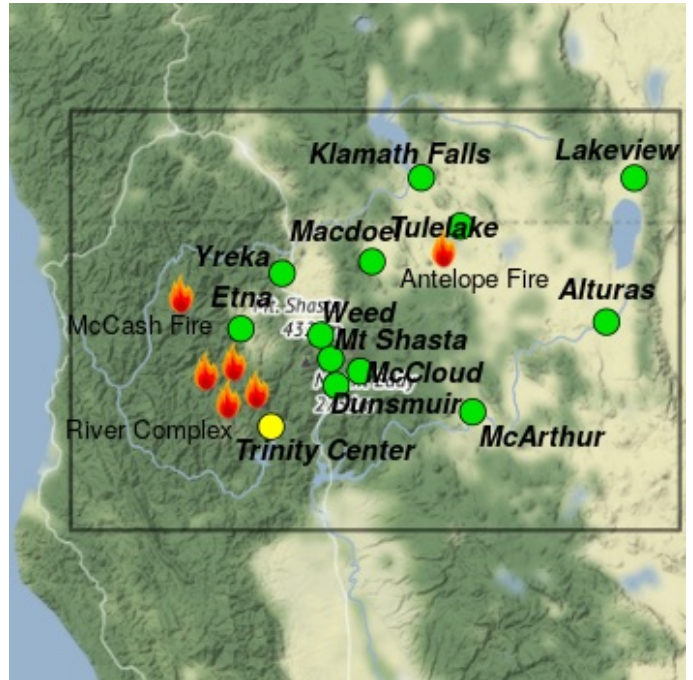

Containment on the RIVER COMPLEX held at 45% with little/no growth yesterday (IR unavailable due to clouds). Rain showers continue over the NW areas of the fire this morning, which received 0.7-1.0" of rain from yesterday's storm--little growth is likely today. The ANTELOPE FIRE likely grew 3-400 acres (No IR; containment = 88%) and received about 0.2-0.6" of rain yesterday, with little growth also likely today. See inciweb.nwcg.gov for the latest.

Smoke

We are seeing Good air quality this morning throughout the forecast area. Any impacts today would be due to new fire activity, which is unlikely, but would most likely occur near the fires under light NW winds likely after the showers this morning clear. Tomorrow, NW winds and drying are likely to continue, and any smoke to Moderate/USG will be most likely to show up near to, and SE of, fire activity.

Health and Safety

When good air quality presents itself, but the fires aren't out, it is a good opportunity to open windows and air out your house. More about protecting yourself from wildfire smoke at: ww2.arb.ca.gov/protecting-yourself-wildfire-smoke/

Daily AQI Forecast* for Sep 19, 2021

Station	Yesterday	Sat 9/18	Forecast* Comment for Today -- Sun, Sep 19	Forecast*	
	hourly			Sun 9/19	Mon 9/20
Yreka	6a noon 6p No hourly data	●	Good/Moderate likely all day	●	●
Etna		●	AM-Good; late afternoon/evening Moderate/USG possible	●	●
Weed		●	AM-Good; late afternoon/evening Moderate/USG possible	●	●
