TULARE COUNTY RESIDENT INFORMATION: Residents requesting information on the status of their property can call the Tulare County Information Hotline at (559) 802-9790. Affected property owners should complete the September Lightning Fire Information Form online at: <https://bit.ly/3ETdZjL>.

CURRENT SITUATION: The Windy Fire is **97,014, acres** with **72% containment** and is a **full suppression fire**. The fire is burning on the Tule River Indian Reservation and the Sequoia National Forest, which includes the Giant Sequoia National Monument. The fire increased 2,268 acres in the last 24 hours. The acreage increase is within the established indirect containment lines.

Last night crews completed and secured the containment line on the southern portion of the fire from Baker Peak west to Sugarloaf and to M50 north of California Hot Springs. Today, two areas remain a priority for securing containment: the northwest side on the Tule River Indian Reservation south to M50 (at the switchbacks) and the east side in the Kern River Canyon from Johnsondale south to Baker Peak.

On the northwest side the fire continues to move slowly west towards the indirect dozer line and handlines that have been completed from M50 northwest to Lone Pine Mountain and to Wheatons on the Tule River Indian Reservation. Crews are continuing to look for opportunities to directly attack the active fire front. In the rugged and inaccessible drainages, where it is not safe for firefighters to work, crews continue implementing a tactical firing operation to remove vegetation between the indirect containment line and the fire's edge.

On the east side, north of Baker Peak, five hotshot crews hiked into Ant Canyon through the already burned area to construct hand line and to direct water dropping helicopters and the Bombardier CL-415, (Super Scoopers) in extinguishing hotspots. Crews will continue today focusing their efforts in Ant Canyon and Tobias Creek as well as removing brush and vegetation along the Whiskey Flat Trail (32E35).

On the rest of the fire's perimeter, where firefighters are working to extinguish hotspots within the containment lines. The Fire Behavior Specialist instructed crews to be vigilant and watch for any rolling materials such as pine cones and logs that could escape and start new fires.

WEATHER AND FIRE BEHAVIOR: Cooler temperatures and higher humidity are expected today. A Pacific storm system is expected to bring much cooler temperatures and a chance of precipitation later this week.
