Issued by Wildland Fire Air Quality Response Program on May 06, 2022 at 07:38 AM MDT

Special Statement

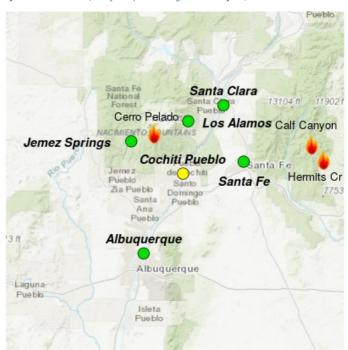

** AIR QUALITY ALERT ** Through noon Friday. Smoke will continue to significantly impact areas across the forecast area. See link to alert below. ** Los Alamos National Laboratories has two smoke monitors, one located in Los Alamos and the other in White Rock can be found in a link at the bottom of the page **

Fire

Fire Size: 30990 Acres, 13% contained. Winds are expected to be light again today but the temperatures will be 5-10 degrees warmer with low relative humidities. Weather and fuel conditions will continue to support active fire behavior across the eastern half of the fire today. Saturday will bring the first of several consecutive critical fire weather days.

Smoke

Expect mostly GOOD to MODERATE air quality conditions across the forecast area today and tomorrow. Santa Fe area should expect some periods of MODERATE today but trending towards better air quality tomorrow. Los Alamos, White Rock and up to Santa Clara areas should expect periods of MODERATE today but GOOD air quality overall and then expect worsening air quality into tomorrow. Areas west of the fire and on down to Albuquerque should continue to see GOOD air quality today and into tomorrow. Pueblo de Cochiti and Santo Domingo Pueblo should expect a continuing trend of better air quality into tomorrow.
