Issued by Wildland Fire Air Quality Response Program on May 10, 2022 at 07:52 AM MDT

Special Statement

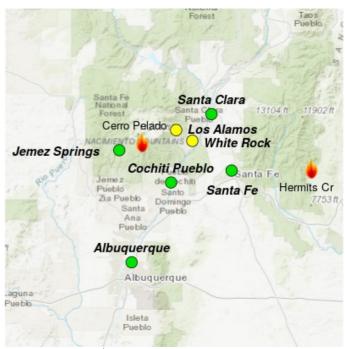

AIR QUALITY ALERT Through noon today. Very windy and dry conditions persist. South to Southwest winds will blow smoke and dust into communities north and northeast of the fires. More information regarding this alert can be found at the link below.

Fire

Fire is at 42,491 acres and 11 % contained. RED FLAG WARNING issued today from noon to 9pm. Strong winds, low humidity, and hot temperatures will be with us again today. Conditions are still very conducive to fire growth. The area with the most potential for growth remains along the northern edges of the fire. Fire will continue to actively burn in Alamo Canyon, and back towards Hwy 4.

Smoke

South-Southwest winds will move most of the smoke into the communities of Los Alamos, White Rock, and Santa Clara. Overall conditions are expected to remain GOOD to MODERATE. Santa Fe and Cochiti Pueblo could see brief periods of light smoke and haze. With the extremely dry and windy conditions that we have, fire behavior could increase at any time, so stay alert to changing conditions.

Daily AQI Forecast* for Wednesday --

	Yesterday	Mon	Forecast*	Tue	Wed
Station	hourly	5/09	Comment for Today Tue, May 10	5/10	5/11
	6a noon 6p
