

Smoke Outlook

Klamath Basin Yeti Fire & SRF Lightning Complex

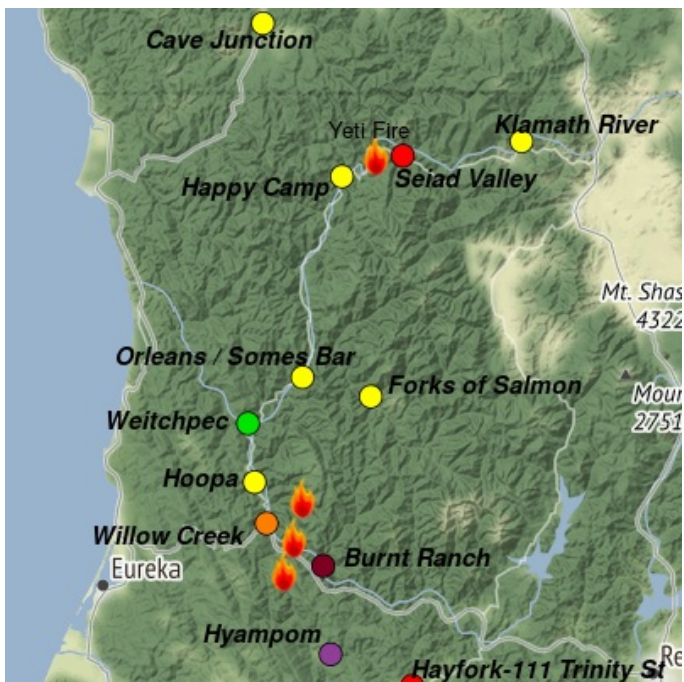

8/09 - 8/10

Issued by [Wildland Fire Air Quality Response Program](#) on August 09, 2022 at 08:02 AM PDT

Fire
Fire activity has greatly decreased over the Yeti Fire, but there remain some pockets of active burning and heavy fuels will continue to smolder for quite some time. The SRF Lightning Complex near Willow Creek continues to have active fire behavior.

Smoke
Smoke from the Yeti Fire will remain heavy in Seiad Valley today with noticeably less smoke expected in Klamath River and Happy Camp. Orleans and Forks of Salmon may experience smoke from either the Yeti Fire or the SRF Lightning Complex, but air quality is expected to be mostly in the Moderate in both locations. Heavy smoke from the SRF Lightning Complex is expected to impact nearby communities, with Hazardous air quality much of the day in Burnt Ranch. Periods of Very Unhealthy are also likely in Hyampom. Light onshore wind is expected to limit the amount of smoke impacting Weitchpec, Hoopa, and Willow Creek.

Fire and Smoke Map
For current smoke conditions and additional hourly data, see the Fire and Smoke Map at "<https://fire.airnow.gov/>"

Daily AQI Forecast* for Tuesday

Station	Yesterday hourly	Mon 8/08	Comment for Today -- Tue, Aug 09	Forecast*	Tue 8/09	Wed 8/10
