The Six Rivers Lightning Complex remains in unified command with California Interagency Incident Management Team 14, California Highway Patrol, Trinity County Sheriff, and Humboldt County Sheriff. The Six Rivers Lightning Complex is currently 30,775 acres with 80% containment and 1,970 personnel assigned to the incident.

### CURRENT SITUATION

Saturday, an inversion layer over the Ammon and Campbell fires kept fire activity low throughout most of the day. This weather pattern has proved beneficial for fire suppression, but temperatures are forecasted to rise slightly by Monday, which could increase fire activity.

Firefighters are continuing to monitor and strengthen the containment lines around both the Ammon and Campbell fires. The **Ammon Fire** experienced low fire activity Saturday, staying within its current footprint. On the **Campbell Fire**, firefighters made progress conducting defensive firing operations along the Lone Pine Ridge control line. To date, defensive firing operations have been conducted along approximately seven miles of planned control lines. Scouting is continually being done around the proposed control line to find safe options to shrink the current proposed burn area.

The plan for Sunday is to continue defensive firing operations, strengthen any weak points in containment lines, prepare areas south of the Campbell Fire for structure defense, and bring the Tish Tang Ridge contingency closer to completion.
