

Lake 3 Fire

Date issued

September 8, 2022

Fire information

Please contact the Kawishiwi Ranger District office (218) 365-7600 or online at [InciWeb the Incident Information System \(nwcg.gov\)](https://www.nwcg.gov)

Description

On September 7, 2022, at 1:30 p.m. a fire was reported to the Superior National Forest. The fire is located at Township 63N, Range 9W, Section 35—southeast of Lake Three and north of Horseshoe Lake in the Boundary Waters Canoe Area Wilderness. In response, two Beaver float plans began aerial suppression. The fire is estimated at 10 acres.

Resources

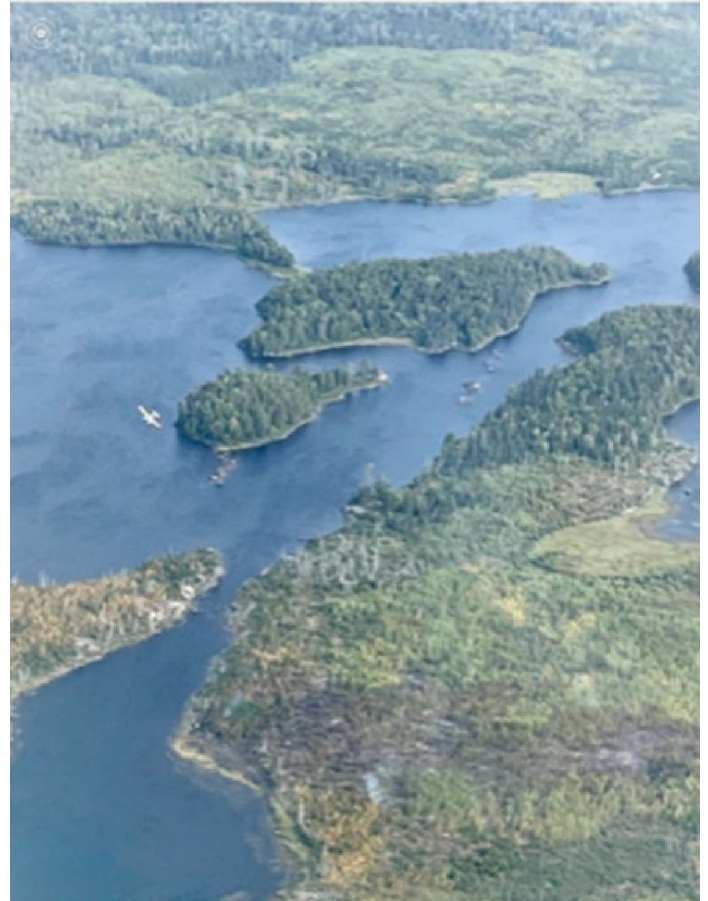

Today Beaver aircraft continue to use aerial water delivery for fire suppression. An upcoming cold front is estimated to bring cooler temperatures, some precipitation and less winds to allow the Superior to reassess if conditions are safer for firefighters to begin ground suppression. Public safety crews are in the area. Firefighter and public safety are the top priority.

Closures

One campsite located on the north-east corner of Lake 3, is currently closed for firefighting operations.

Fire Restrictions

None
