Start Date & Time: Tuesday, 9-6-2022, 6:27pm
Cause: Under Investigation
Location: Mosquito Road at Oxbow Reservoir
Suppression Strategy: Full Suppression
People Evacuated: 11,260
Structures Threatened: Approximately 5,848
Total Structures Destroyed: 46
Total Structures Damaged: 5

The Mosquito Fire remains in unified command with California Interagency Incident Management Team 5, CAL FIRE, Placer County Sheriff, and El Dorado County Sheriff

CURRENT SITUATION

Thick smoke and clouds kept temperatures in the 70s to low 80s with higher relative humidity values throughout Monday. An incoming weak weather system is forecasted to bring slightly stronger southwest winds that will bring drier air aloft today. This air movement should help break up the smoke inversion earlier today. The increase in clearer skies is projected to provide the fire with more available oxygen for active burning.

Overnight, firefighters continued strengthening and securing control lines around most of the fire's perimeter. Crews added containment on a large portion of the fireline in the Michigan Bluff area and continue to make great strides towards completing more containment lines all along the Foresthill Road corridor. Firefighters are remaining vigilant on the southern edge of the fire to ensure that there is no threat of escape across Volcanoville Road or towards Quintette. The CAL FIRE HAWK night flying helicopter was able to assist with water-dropping operations overnight and remains a valuable resource for firefighters working during the night.

Resources continue to arrive in the area to assist with the full suppression efforts against the Mosquito Fire. A continued priority has been to secure the southwest corner of the fire. Last night, firefighters continued to hold the control lines and firing operations completed during Monday's operations. Securing this vital piece of line, which ties into the Middle Fork of the American River, is crucial in preventing further spread to the communities to the west, such as Todd Valley and Foresthill.

Firefighters are working diligently to secure the firelines in and around all the evacuated communities. Unified Commanders are working with the various cooperators, such as the utility companies, to ensure the areas are safe before residents are allowed home. With the continued threat of fire, damaged infrastructure, and large amounts of firefighting equipment in the area, it is currently unsafe for the public to be in the fire area. Fire and law enforcement officials continue to meet daily on the progress of the firefighting efforts and are preparing for utility companies to start their repair and inspection work.

MOSQUITO FIRE INCIDENT UPDATE

Date: 9-13-2022 Time: 7:00 a.m.

EVACUATIONS — PLACER COUNTY

View current Placer County evacuation orders and warnings on the interactive map: placer.ca.gov/evacuations.
ReadyPlacer dashboard for Mosquito Fire information: tinyurl.com/234azf6d
