Issued by Wildland Fire Air Quality Response Program on October 04, 2022 at 08:29 AM PDT

Fire

The weather continues to be warm and dry with low humidity and light winds may result in elevated burning conditions. The most active portion can be observed in the southwest section of the fire. Unburned pockets of fuel continue to smolder and produce smoke within the fire perimeter. For size, containment, and detailed information about the fire, see https://inciweb.nwcg.gov/incident/8307/

Smoke

Smoke conditions today are expected to be Good to Unhealthy in the forecast area. Predicted after noon light northwest winds have the potential to bring smoke into Crescent Lake and La Pine communities this evening to overnight. Due to the varied geography within Oakridge, Unhealthy to Hazardous air quality conditions may persist with slight improvement in the afternoon due to light winds. Air quality may change unexpectedly. Smoke impacts will be heavily dependent on fire activity.

Daily AQI Forecast* for Tuesday

	Yesterday	Mon	Forecast*	Tue	Wed
Station	hourly	10/03	Comment for Today Tue, Oct 04	10/04	10/05
	6a noon 6p			_	_
