

# Smoke Outlook

## Northern-Central New Mexico

8/10 - 8/11

Issued by [Wildland Fire Air Quality Response Program](#) on August 10, 2023 at 07:26 AM MDT

### Fire

**Black Feather Fire || American Mesa Fire** A classic monsoon pattern more typical of the first half of August will bring increasingly moist, favorable weather conditions and much needed rainfall to active fires within the outlook area through week's end into early next week. This includes the Black Feather and American Mesa fires. The period from Saturday through Monday looks especially wet with scattered to numerous showers and slow-moving thunderstorms. This multi-day fire-slowng pattern will significantly reduce fire activity and smoke.

### Smoke

The Black Feather Fire had limited smoke production on Wednesday and that trend should continue today. Smoke impacts for nearby communities immediately east and north of the fire's perimeter may briefly exceed MODERATE levels to include Mesa Pinebetal and Mesa Poleo through Friday morning, as daytime transport winds remain from the west and northwest. Some light to moderate nighttime smoke may settle and impact parts of NM 96 during the next 24 hours. Elsewhere, smoke impacts will continue to be limited near the American Mesa Fire. Fires to the north and northwest of New Mexico will continue to contribute to haze/light smoke aloft at times that should also diminish going into Friday.

Daily AQI Forecast\* for Thursday

Station	Yesterday hourly			Wed 8/09	Comment for Today -- Thu, Aug 10	Forecast*	
	6a	noon	6p			Thu 8/10	Fri 8/11
Grants	No hourly data				GOOD air quality expected to continue through early next week.	●	●
Albuquerque Metro				●	Overall, GOOD air quality expected.	●	●
Farmington	No hourly data				GOOD air quality expected with some light haze today.	●	●
Chama				●	GOOD air quality expected. Some light haze/smoke aloft, mainly north and east.	●	●
