Those driving in the area are asked to continue to drive with caution as there is still ample fire traffic in the area, as firefighters will continue to patrol of direct handline and dozer line. The fire remains 1.8 miles from the nearest structure. The Forest Closure remains in place fire firefighter and public safety around active operations.

Until a season-ending event occurs, smoke may be visible from pockets of unburned fuels within the perimeter of the fire. The smoke that has settled into the area is from existing and new large fires in Washington and British Columbia. See <https://fire.airnow.gov/> for more detailed smoke information.
