

## Smith River North Complex – Forecast

August 24, 2023, 09:30 a.m.

### **ALERT: WEATHER ADVISORY**

Widely scattered, fast moving thunderstorms are expected to move over the Illinois Valley around 6:00pm this evening and last through the late evening hours. Any thunderstorms that form will bring dangerous lightning and erratic outflow winds that may be as strong as 40 mph. Additionally, dense smoke forecasted to move over the area will make it extremely difficult to visually see thunderstorms building overhead.

- Jonathan Chriest, Incident Meteorologist

*Based upon the most current weather forecast and in the interest of public safety, the Smith River Complex North public meeting scheduled for 6:00 p.m. will be **virtual only** on Smith River Complex North 2023 Facebook.*
