

# Smoke Outlook

## SW/SC Oregon Smith River Complex

9/05 - 9/06

Issued by [Wildland Fire Air Quality Response Program](#) on September 05, 2023 at 06:55 AM PDT

### Special Statement

Smoke and fog can reduce visibility on roadways. Reduce your speed and use caution when visibility is impacted. No air quality advisories for today. More information at [Oregon Smoke](#).

### Fire

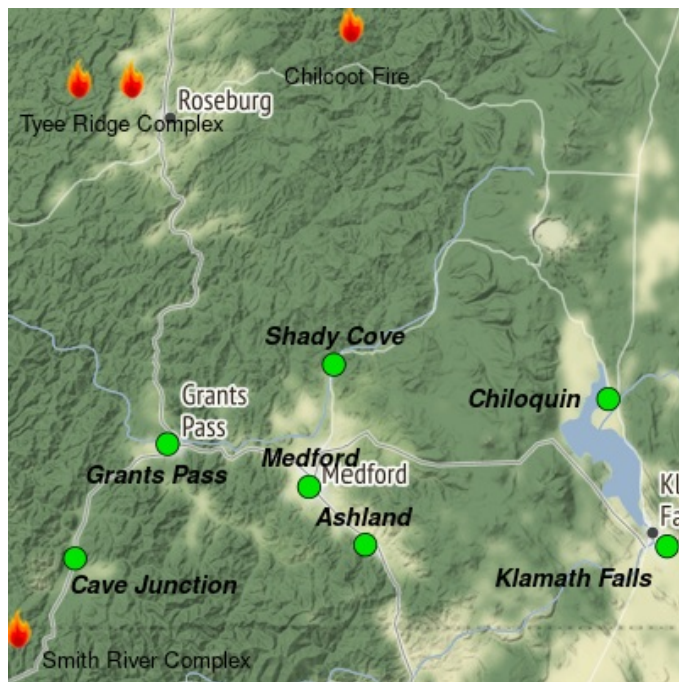

In addition to Smith River Complex, multiple active fires across OR may contribute smoke to the forecast area, including: Chilcoot Fire, Ridge Fire, Salmon Fire, Dinner Fire, Lookout Fire, Tyee Ridge Complex, Bedrock Fire, Flat Fire, and Brice Creek Fire. For more information, see [InciWeb](#).

### Smoke

For today, little to no smoke will be expected. Due to recent rain and cool overnight temperatures, air quality in the forecast area is greatly improved. Today, air quality will remain GOOD. Later in the week, W winds could return some smoke from the Smith River Complex back into parts of the area. While National smoke models are predicting much improvement in smoke dispersion into mid week, smoke conditions can change at any time. If you see smoke and smell smoke, you're breathing smoke. For near real-time air quality information, see the [Fire and Smoke Map](#). Smoke impacts from wildfires in Canada may also be possible. Information about wildfires in Canada available at [Natural Resources Canada](#).

### Road Cameras
