

Smoke Outlook

Northwest California-Interior Happy Camp Complex

Issued by Wildland Fire Air Quality Response Program on September 24, 2023 at 08:17 AM PDT

9/24 - 9/25

Fire

There was minimal fire activity yesterday on the Happy Camp Complex, which is holding steady at 21,386 acres and 70% containment. Heavy smoke helped to slow any growth on the fire. The big news is the rain Sunday night into Monday that will help further suppress the fire, but will also present risks for crews on the ground.

Smoke

More smoke inundated our area yesterday which didn't give the valleys a chance to clear out. The heavy smoke will remain in the Very Unhealthy to Hazardous range for much of the morning. Slight improvements are possible if winds can clear out the low lying smoke, or if light rain showers start earlier in the day. Happy Camp is seeing improvements from some rain this morning. Ultimately, it will take the approaching rain storm to wash out much of the smoke on Monday and give communities some relief after several days poor air quality.

Additional Information

Details on other fires in the region are available at inciweb.nwcg.gov. More information on smoke in the surrounding area can be found at outlooks.wildlandfiresmoke.net.

Daily AQI Forecast^{*} for Sunday

	Yesterday	Sat	Forecast*	Sun	Mon
Station	hourly	9/23	Comment for Today Sun, Sep 24	9/24	9/25
