

# Smoke Outlook

## Northwest California-Interior Happy Camp Complex

# 9/26 - 9/27

Issued by Wildland Fire Air Quality Response Program on September 26, 2023 at 07:14 AM PDT

### Special Statement

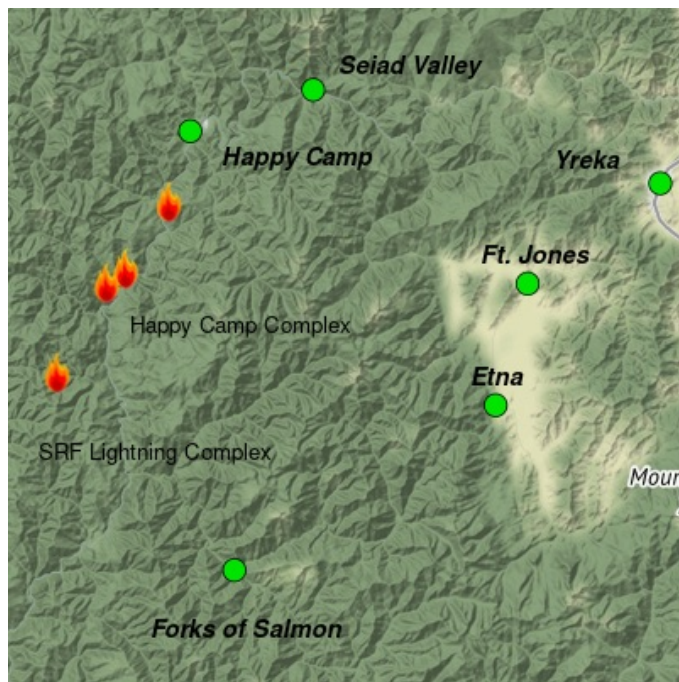

This is the last outlook for the Happy Camp Complex. Starting tomorrow, the SRF Lightning Complex will begin to cover Happy Camp, Seiad Valley and Forks of Salmon: <https://outlooks.wildlandfiresmoke.net/outlook/0e644879>

### Fire

The rain over Northern California brought significant rainfall over the remaining pockets of heat on the Happy Camp Complex. We are still reporting 73% containment and 21,386 acres. Rain will continue through the morning and we will start seeing drying this afternoon, but crews expect very little fire behavior and will continue with mop up and suppression repair today.

### Smoke

The rain brought Good air quality across the region yesterday and will continue for today. Smoldering is possible once the rain stops, however, today is too wet and any smoke tomorrow will head south out of our area. Later this week, if nearby fires still have activity, smoke production could work its way back up the Klamath River corridor and up towards Happy Camp.

Daily AQI Forecast\* for Tuesday

Station	Yesterday hourly			Mon 9/25	Comment for Today -- Tue, Sep 26	Forecast*	
	6a	noon	6p			Tue 9/26	Wed 9/27
