

Smoke Outlook

SW/SC Oregon Smith River Complex

9/04 - 9/05

Issued by [Wildland Fire Air Quality Response Program](#) on September 04, 2023 at 07:30 AM PDT

Special Statement

Smoke and fog can reduce visibility on roadways. Reduce your speed and use caution when visibility is impacted. Air quality advisory for Douglas County near Interstate 5 lifts Monday afternoon. More information at [Oregon Smoke](#).

Fire

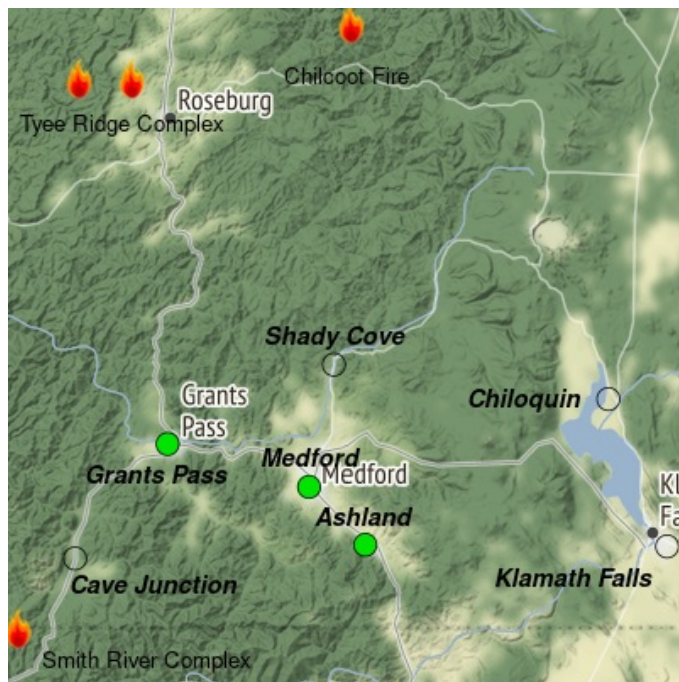

In addition to Smith River Complex, multiple active fires across OR may contribute smoke to the forecast area, including: Chilcoot Fire, Ridge Fire, Salmon Fire, Dinner Fire, Lookout Fire, Tyee Ridge Complex, Bedrock Fire, Flat Fire, and Brice Creek Fire. For more information, see [InciWeb](#).

Smoke

For today, little to no smoke will be expected due to continued cool and damp weather. Weekend precipitation and cooler temperatures suppressed smoke generation and greatly improved air quality in the forecast area. Today, air quality will remain GOOD. Mid week, W winds will return some smoke from the Smith River Complex back into parts of the area. While National smoke models are predicting much improvement in smoke dispersion today and into mid week, smoke conditions can change at any time. If you see smoke and smell smoke, you're breathing smoke. For near real-time air quality information, see the [Fire and Smoke Map](#).

Road Cameras
