Issued by Wildland Fire Air Quality Response Program on September 28, 2023 at 08:42 AM PDT

Fire

Isolated light rain showers will limit fire activity. Smoldering will continue where heat remains. Showers and winds late Thursday into Friday will bring moisture over the fire. Winds will pick up Friday evening and overnight into Saturday. Significant fire spread is not anticipated given recent weather; however, if a warming and drying trends start early next week fire activity is likely to increase. Tactical operations will continue to increase containment and secure the fire footprint.

Smoke

Overall, GOOD air quality continues throughout the forecast area. Intermittent periods of MODERATE to UNHEALTHY FOR SENSITIVE GROUPS conditions are expected in areas where residual overnight drainage smoke is anticipated. Along HWY 101 from Humbug State Park northward to the Coos-Curry County Line, intermittent smoke is possible. Combined with fog, limited roadway visibility during nighttime hours is likely. Heaviest smoke impacts will be in low-lying areas along the Elk and Sixes River drainages. Incoming precipitation and gusty winds Thursday night into Friday will limit additional smoke production and accumulation. By the weekend, light winds and drier conditions will promote more smoldering and creeping within the fire, allowing smoke to build in areas downstream of any active heat.

Daily AQI Forecast* for Thursday

	Yesterday	Wed	Forecast*	Thu	Fri
Station	hourly	9/27	Comment for Today Thu, Sep 28	9/28	9/29
	6a noon 6p				
Brookings			GOOD AQ throughout the forecast, intermittent light smoke		
Gold Beach	No hourly data		GOOD conditions expected, disperse smoke overnight.		
Agness	No hourly data		GOOD conditions with periods of dispersed light smoke.		
Port Orford	No hourly data		Morning USG smoke dispersing midday, residual overnight smoke possible.		
Powers			Light afternoon smoke possible, depending on fire activity.		
Bandon	No hourly data		Intermittent light smoke possible midday, clearing at night.		
Myrtle Point	No hourly data		Intermittent light-to-moderate smoke midday on Thursday.
