

# Smoke Outlook

## North Central OR/WA Camp Creek

9/10 - 9/11

Issued by [Wildland Fire Air Quality Response Program](#) on September 10, 2023 at 06:54 AM PDT

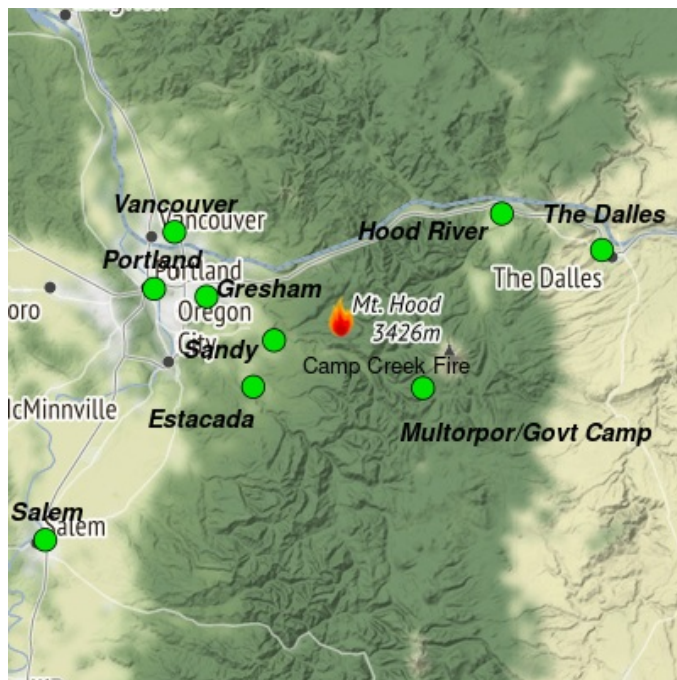

### Fire

The Camp Creek fire is reported at 2,021 acres with 28% containment. Crews continue to make progress containing the fire by using firing operations to secure firelines. The increase in acres is due to firing operations rather than fire spread.

### Smoke

Expect similar smoke conditions today and tomorrow compared to the past several days. Smoke dispersion patterns will remain the same, with light west winds bringing light smoke eastward during the afternoon and evening, and down-slope winds bringing smoke towards East Portland at night and clearing out late morning. With cloud cover tomorrow, smoke may be more persistent and may not dissipate until early afternoon. Areas near the mouth of the Sandy River, such as Troutdale, Gresham, and Camas, may reach Unhealthy levels in the mornings.

Check out the current quality conditions in your area at the [AirNow Fire and Smoke Map](https://fire.airnow.gov) (<https://fire.airnow.gov>)

Daily AQI Forecast\* for Sunday

Station	Yesterday hourly			Sat 9/09	Comment for Today -- Sun, Sep 10	Forecast*
