

Smoke Outlook

North Central OR/WA Camp Creek

9/06 - 9/07

Issued by [Wildland Fire Air Quality Response Program](#) on September 06, 2023 at 07:30 AM PDT

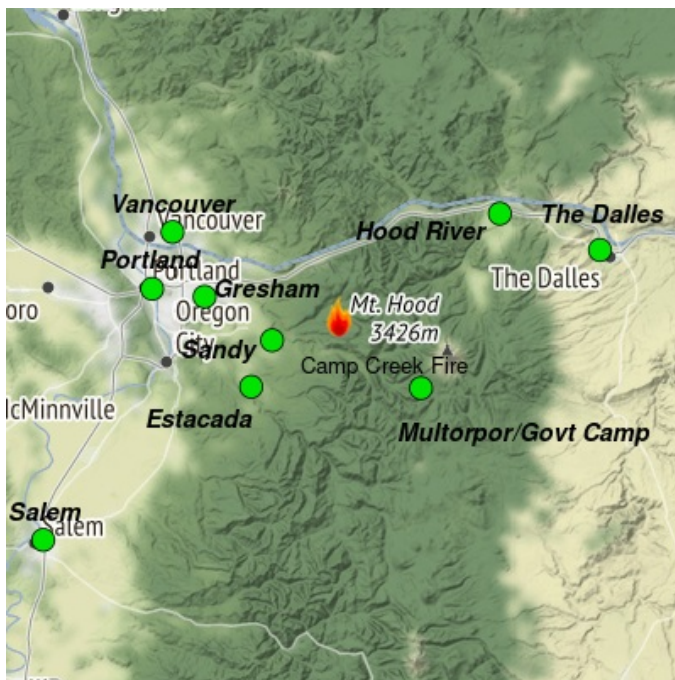

Fire

The Camp Creek fire is still reported at 1,902 acres with 16% containment. Expect a gradual increase in fire activity the next few days as continued sunshine leads to dryer fuel conditions.

Smoke

Light west winds are in the extended weather forecast, which will bring smoke eastward towards Mount Hood, Hood River, and the Dalles during the day and possibly settling at night. At night, smoke will move down-slope towards East Portland and clear out mid to late morning. Tomorrow and tomorrow night, any smoke that does impact communities will be light and impacts will be minimal, with the exception of the communities near the mouth of the Sandy River, such as Troutdale, Gresham, and Camas, which may reach Unhealthy levels in the mornings.
