## Northwest California-Coastal SRF Lightning Complex

Issued by Wildland Fire Air Quality Response Program on September 29, 2023 at 07:45 AM PDT

## Special Statement

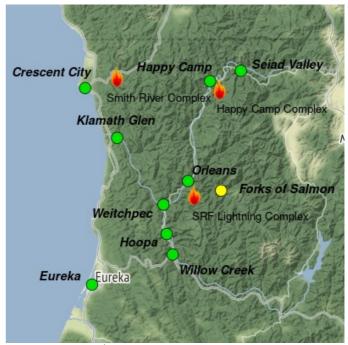

This outlook focuses on Six Rivers Forest (SRF) Lightning Complex, one of several fires in northern California. For more information on fires, please refer to InciWeb at SRF Lightning, Happy Camp, and Smith River.

## Fire

Today, light rain and cloud cover will limit fire activity to creeping and smoldering conditions. A drying trend is expected to occur in the coming days, leading to moderate increases in fire activity.

## Smoke

Light smoke is expected to be produced in isolated areas in the Mosquito and Pearch fire areas. Calm winds on Friday morning will keep smoke impacts to areas close to the fires, with MODERATE conditions expected in Forks of Salmon and variable smoke along the Salmon River Road. GOOD conditions are expected overall in other areas of the Smoke Outlook, but some hours at MODERATE may occur in Orleans, Happy Camp, and potentially Seiad Valley due to smoke channeling to these areas in the afternoon to evening hours. Saturday, winds are expected to shift to transport smoke southward and continued drying may lead to a moderate increase in smoke production.

Daily AQI Forecast\* for Friday

Issued Sep 29, 2023 by Gayle Hagler, Air Resource Advisor (ghaglerara@gmail.com)

Air	Quality Index (AQI)	Actions to Protect Yourself
	Good	None
	Moderate	Unusually sensitive individuals should consider limiting prolonged or heavy exertion.
	USG	People within Sensitive Groups* should <b>reduce</b> prolonged or heavy outdoor exertion.
	Unhealthy	People within Sensitive Groups* should <b>avoid all</b> physical outdoor activity.
	Very Unhealthy	Everyone should avoid prolonged or heavy exertion.
	Hazardous	Everyone should avoid any outdoor activity.

\*Disclaimer: This forecast is based on fine particulates only; ozone is not included. Forecasts may be wrong; use at own risk. Use caution as conditions can change quickly. See your health professional as needed. Smoke sensitive groups should take appropriate precautions.
