

## Quarry Fire Update

Saturday, September 30, 2023

**Stanislaus National Forest  
Incident Management Team (Type-3)**

### PIO Contacts:

Eugenie Moore - [eugenie.moore@usda.gov](mailto:eugenie.moore@usda.gov)  
steve lyon - [slyon@nps.gov](mailto:slyon@nps.gov)

### Fire Statistics:

**Location:** The Quarry Fire is located on the Mi-Wok Ranger District, Stanislaus National Forest, off Forest Road 3N01, east of Bourland Creek and approximately four miles west of the Emigrant Wilderness Border.

**Acres Burned Today:** 40

**Cause:** Lightning

**Injuries:** 0

**Acres Burned to Date:** 5,557

**Total Personnel:** 138

**Background:** The Quarry fire was one of many fires ignited by lightning strikes across the forest on September 9, 2023. District fire managers immediately worked to ensure these naturally ignited fires stayed within pre-determined boundaries. Fire personnel with the Stanislaus National Forest are currently managing the Quarry Fire to achieve multiple resource objectives.

### Current Activities:

There was very little growth on the fire's perimeter today, with rain and drizzle falling most of the day. Crews worked on clearing hazard trees near roads and trails, and gathered down fuels for pile burning.

Fire professionals are managing fire behavior and intensity to provide for multiple resource benefits including reducing concentrations of all fuels, re-establishing multigenerational timber stands, improving wildlife habitat, promoting plant diversity, and re-introducing fire into fire adapted ecosystems.

### Closures:

Soft closures are in effect to provide for the safety of the public utilizing public lands as well as fire personnel working in the area. The soft closures are an encouragement for the public to stay clear of the area, to find alternate routes to their locations and to provide fire personnel the widest berth possible as they go about their mission.

With the public's cooperation, we will continue to monitor the number and duration of each, recognizing that fire personnel and public safety is the focus.

As of September 28, 2023, the following soft closures are in effect:

3N21 where it meets 3N16

3N34Y

3N16

2N71 where it meets 3N16

3N01L

3N16 at 3N94

3N21 where it meets 3N01

3N01J

3N22 where it meets 3N01

3N01H

### Smoke:

Smoke impacts from the Quarry Fire, the prescribed burns of the Experimental Forest, Dry Meadows and Beardsley Burn units on the Summit Ranger District will cause smoke to settle in low lying areas. Check out the fire and smoke map at [fire.airnow.gov](http://fire.airnow.gov) for more information.
