

Smoke Outlook

10/02 - 10/03

Northwest California-Coastal SRF Lightning Complex

Issued by Wildland Fire Air Quality Response Program on October 02, 2023 at 06:04 AM PDT

Special Statement

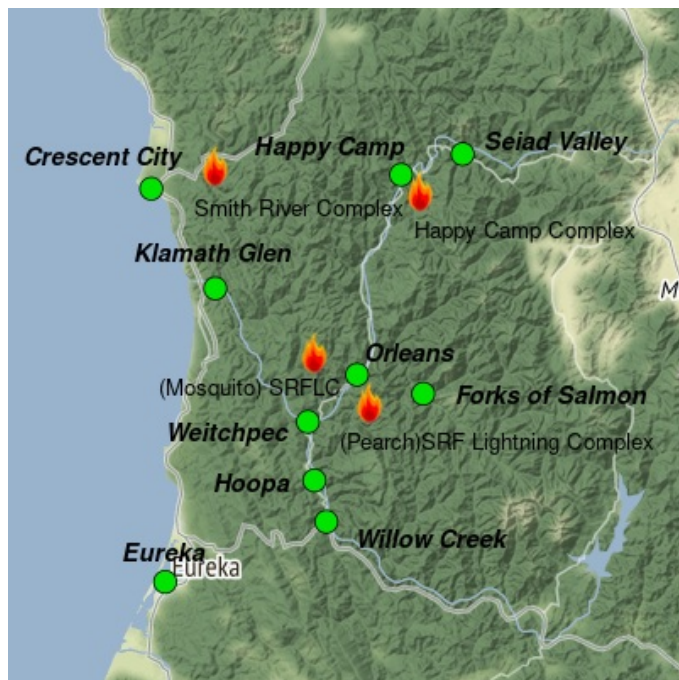

This outlook focuses on Six Rivers Forest (SRF) Lightning Complex, one of several fires in northern California. For more information on fires, please refer to InciWeb at [SRF Lightning Complex](#), [Happy Camp Complex](#), and [Smith River Complex](#). **Online Interactive Version Link: [Wildfire Smoke Outlook](#)**

Fire

The SRF Lightening Complex consists of the Mosquito Fire and Pearch fires that are currently producing very light smoke in isolated areas. The current outlook area has seen little growth the past 3 days with cloud cover, low temperatures and rain. We will start to see changes in fire activity as we see clear skies, along with forecasted temperature increases, and north-northeast-northwest winds increase in the outlook areas.

Smoke

Overall GOOD air quality in the outlook area today into Tuesday. Slight MODERATE smoke in the Salmon River Road area around Somes Bar early a.m. We will see an increase in humidity in the outlook area this morning and slight possible afternoon showers in the SRF Lightening Complex areas. Possible periods of light MODERATE smoke in the Happy Camp area and Klamath Glen areas as N/NE winds increase.

Daily AQI Forecast* for Monday

Station	Yesterday			Sun 10/01	Comment for Today -- Mon, Oct 02	Forecast*	
	6a	noon	6p			Mon 10/02	Tue 10/03
