

Smoke Outlook

South Central Colorado

10/29 - 10/30

Issued by [Wildland Fire Air Quality Response Program](#) on October 29, 2023 at 07:40 AM MDT

Fire

Several inches of snow are expected to cover the fire area today. After morning temperatures in the teens, highs will struggle to reach 20F over the fire and 30F over ICP today. Clear skies tonight will bring another very cold but dry night. Cold high pressure building in behind the snow storm on Monday will bring sunny skies but temperatures will remain very cold. There will be no appreciable fire activity today due to snow cover and low temperatures.

Smoke

Snow cover across the fire area will keep smoke to a minimum, if any is generated at all. It is doubtful any smoke that happens to escape the snow cover will disperse outside the fire area. Air quality can be expected to be Good.

Daily AQI Forecast* for Sunday

Station	Yesterday	Sat 10/28	Forecast*	Sun 10/29	Mon 10/30
	hourly				
Colorado College			Air quality should remain Good.
