

Smoke Outlook

South-Central New Mexico Blue 2 Fire

6/02 - 6/03

Issued by Wildland Fire Air Quality Response Program on June 02, 2024 at 07:12 AM MDT

Fire

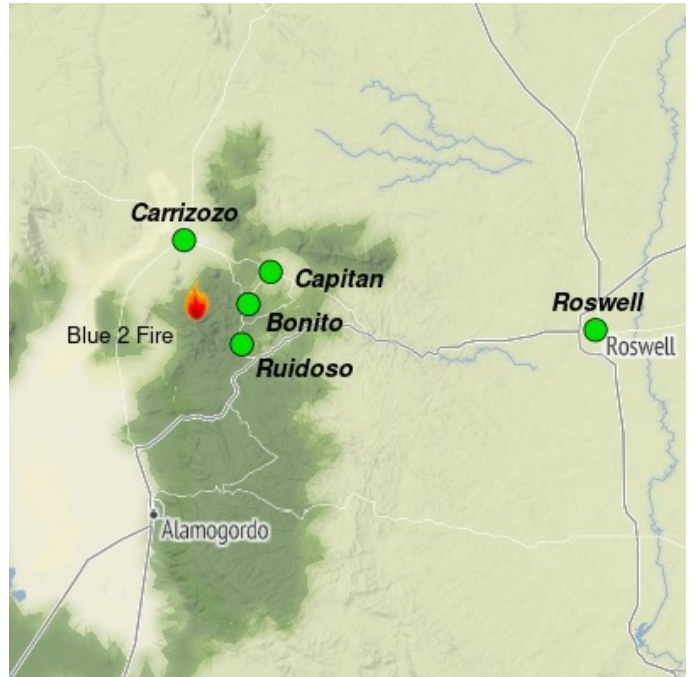

There has been very little fire activity over the past few days. Today, we'll be back in a warm, dry, windy weather pattern. So, the potential exists for pockets of hot fuels to wake up and burn. Stay alert to changing conditions. For more detailed fire information see: [Blue 2 Fire on Inciweb](#).

Smoke

Very little smoke is being produced by the fire, so we should see another day of GOOD air quality and less haze. Since the weather today is more conducive to fire, we may see more burning and more smoke. However, barring any significant fire growth, we should only see periods of light smoke particularly around Bonito and Capitan.

Are You Smoke Ready?

While air quality may be GOOD now, it's not too soon to plan for future wildfire smoke. Check out New Mexico Department of Health's [Fires and Your Health Toolkit](#).

Daily AQI Forecast* for Sunday

Station	Yesterday hourly			Sat 6/01	Comment for Today -- Sun, Jun 02	Forecast*	
	6a	noon	6p			Sun 6/02	Mon 6/03
