

Smoke Outlook

South-Central New Mexico Blue 2 Fire

6/03 - 6/04

Issued by Wildland Fire Air Quality Response Program on June 03, 2024 at 06:44 AM MDT

Special Statement

This is the FINAL smoke outlook to be issued for the Blue 2 fire.

Fire

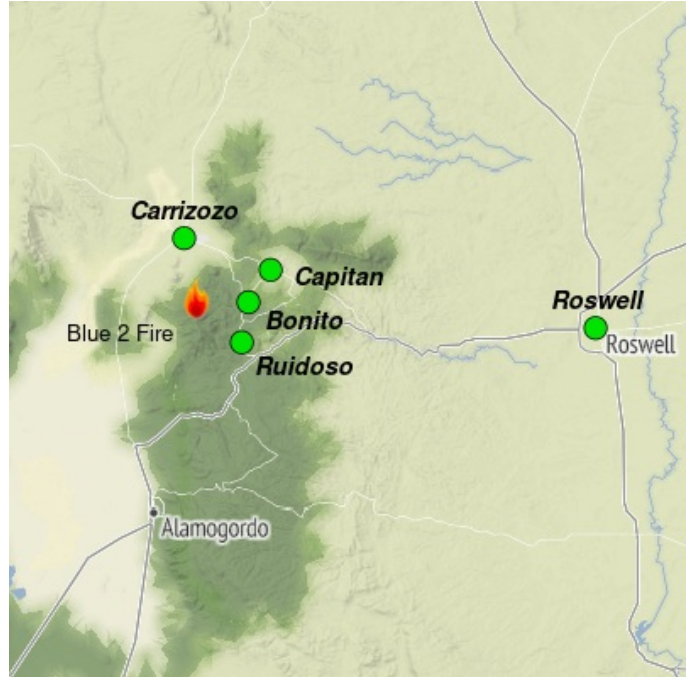

There has been very little fire activity over the past few days. Repair activities are underway throughout the fire perimeter. Some large fuels may continue to smolder, but growth is not expected. For more detailed fire information see: [Blue 2 Fire on Inciweb](#).

Smoke

Minimal smoke is being produced by the fire, so we can continue to enjoy the GOOD air quality for which South-Central New Mexico is accustomed. Transported smoke from other active fires in upwind states or Mexico, may create some hazy skies on occasion. Remember if you want to know what the current air quality is near you, go to [AirNow's Fire and Smoke Map](#).

Are You Smoke Ready?

While air quality may be GOOD now, it's not too soon to plan for future wildfire smoke. Check out New Mexico Department of Health's [Fires and Your Health Toolkit](#).

Daily AQI Forecast* for Monday

Station	Yesterday hourly			Sun 6/02	Comment for Today -- Mon, Jun 03	Forecast*
