During today's fire operations, fire crews improved handlines, patrolled for spot fires, and conducted mop up operations along the fire perimeter. Controlled lines were tested again by nearby thunderstorms. Much of the observed fire behavior was minimal near fire lines, and there was no significant growth from the fire. However, islands and interior pockets of unburned fuel are starting to be consumed. Air assets in coordination with ground crews continued to drop water over the fire, and a reconnaissance flight was conducted over the Cucamonga Wilderness to develop a plan to stop the further spread and contain that flank. The current outlook favors direct attack.

The Forest Service has an area closure in effect for the Vista Fire on the San Bernardino and the Angeles National Forests. The public is prohibited from recreating in the fire area and should not enter the forest on Lytle Creek Road. The closure is in effect to protect firefighter personnel and communities.
