Our primary mission on the Diamond Complex and Middle Fork Fire is to serve the public with dedication and compassion. With your safety and the safety of our firefighters in mind, we are committed to addressing the needs and concerns of your communities by managing and controlling the fires to keep your forests, parks, and natural areas safe and enjoyable. Using safe and aggressive firefighting suppression methods our goal is to help you return to enjoying the outdoors.

The Diamond Complex in the Umpqua National Forest consists of 29 lightning-caused fires totaling approximately 11,053 acres and is 53% contained. Twenty-three of the original 29 fires in the Diamond Complex are now 100 percent contained.

The Middle Fork Fire in the northwest corner of Crater Lake National Park is 5,244 acres and is 0% contained. The fire is primarily burning within the 2015 National Creek and 2017 Spruce Lake fire scars. There was moderate smoke and fire activity yesterday as the fire continued to creep at a slow rate of spread. Throughout the fire area there is an extreme hazard to firefighters due to falling dead standing trees remaining from the 2015 and 2017 fires.

OPERATIONS:

Middle Fork Fire: (5,244 acres, 0% contained):

Crews are removing heavy timber and vegetation along the 230 Road and at the north entrance to Crater Lake National Park. On the southern side, crews are looking for opportunities to safely and aggressively prevent additional fire spread and improve fire lines. Specialized teams are embedded on the fire to create opportunities for additional suppression operations such as removing vegetation and constructing line in the area. **The park remains open.**

Diamond Complex Fires:

Pine Bench Fire (North of Hwy 138 near Dry Creek, 3,943 acres, 30% contained):

Aerial observers noted reduced smoke and fire activity, particularly in the Wilderness. Hand crews and dozers pushed into the lower portion to build fire line along the East and West edges of the fire. Crews are making progress as they build containment into Medicine Creek. Firefighters and heavy equipment will continue improving firelines along the roads from the west side, moving north.

Potter Fire (North of Hwy 138, two miles southeast of Potter Mountain, 3,366 acres, 6% contained):

On the north side, Hot Shots and Dozer operations are working through steep and dangerous terrain while facing extreme hazards from falling trees. Crews continue to build dozer lines and hand lines on the east side of the fire to minimize the potential for spread to the east. On the west side of the fire crews are building fire line along the 2154 Road firefighters.

Trep Fire (About four miles south of Hwy 138, 545 acres, 0% contained):

Firefighters are working to extinguish hot spots, reinforce control line as needed and hold the fire west of Bear Creek Drainage.

Diamond Complex and Middle Fork Fire Incident Update Date: August 22, 2024

Other fires within the Diamond Complex:

Ooya Fire (North of Hwy 138, one mile northeast of Bird Point, 374 acres, 73% contained): Crews, including National Guard units, are conducting patrols and extinguishing hot spots.

Trail Fire (East of Hwy 138 on the west slope of Mt. Thielsen, 842 acres, 77% contained): Crews will continue to extinguish hot spots and ensure firelines continue to effectively prevent further spread.

Loafer Fire (44 acres, 56% contained)

WEATHER AND FIRE BEHAVIOR:

Expect low level clouds around the fire area, especially the Pine Bench fire today. It will be cloudy with cooler temperatures and increased humidity that should result in moderating fire behavior. Chances for rain will increase throughout the day Thursday, but looks like best chances for significant rains will be Thursday night.

SMOKE OUTLOOK:

For the most up to date information, please visit fire.airnow.gov/

EVACUATIONS:

The Douglas County Sheriff's Office has lifted evacuation orders for all areas except for east of the Pine Bench Fire, which remains at a **Level 1: BE SET** for a single residence east of the Potter Fire. For an interactive map of evacuations, visit the Douglas Co. Sheriff's Office website: www.dcsso.com/evacuations

FOREST CLOSURE:

The Forest has reduced the temporary closure order, allowing increased access to specific roads, trails, and campgrounds that are listed as exemptions in Forest Order 06-15-24-06. For more information visit the Umpqua National Forest website at: <https://www.fs.usda.gov/alerts/umpqua/alerts-notices/?aid=88996>

The Rogue River-Siskiyou National Forest has issued a closure for the area north and west of Crater Lake National Forest along Highway 230 south to the intersection with Highway 62. See the Closure Order and map at <https://www.fs.usda.gov/alerts/rogue-siskiyou/alerts-notices>.

PARK CLOSURE:

The North Entrance Road is closed from North Junction to the park boundary at the junction with Highway 138. This closure is necessary to ensure the safety of fire crews and the public. The date for reopening is not known at this time. All other park roads will remain open, except for construction closures on East Rim Drive. Crater Lake National Park remains open and is accessible from Highway 62 on the western and southern routes. Crater Lake National Park has several closures in effect, closure orders and maps can be found at: <https://www.nps.gov/crla/learn/news/temporary-closure-of-north-entrance-road-continues.htm>

REMINDER: The PCT to the east of North Entrance Road and Lightning Springs Trail has been reopened. Between the Lightning Springs and Rim Trail Intersections, Bald Crater Loop, Bert Creek and Boundary Springs Trails are closed until further notice due to potentially hazardous conditions created by the Middle Fork Fire. Hikers and bikers may not use the North Entrance Road to enter or leave Crater Lake National Park.
