

Smoke Outlook

Western Idaho Limepoint

8/06 - 8/07

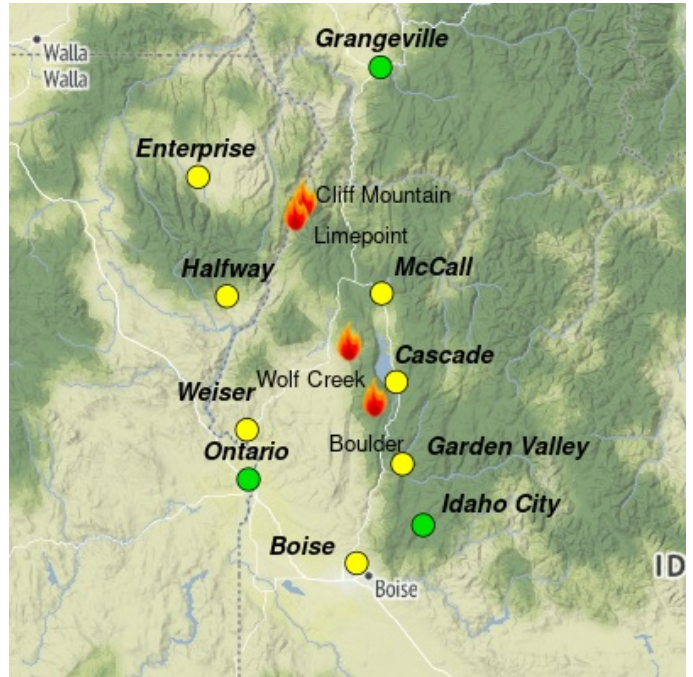

Issued by [Wildland Fire Air Quality Response Program](#) on August 06, 2024 at 07:41 AM MDT

Fire

The Limepoint fire grew 484 acres and now stands at 25,803 acres burned with 8% containment. For more information on Limepoint/Cliff Mountain and West Mountain Complex (Boulder, Wolf Creek, Bull Trout, Wapiti) wildfire incidents, please visit Inciweb (<https://inciweb.wildfire.gov/incident-information/>).

Smoke

Expect a shift in smoke movement pattern today as winds will move from SW to W through today's progression. Initially, smoke will follow the Snake River Corridor SW then shift toward the NE as the temperatures increase. Smoke from very active northern California fires will move smoke through upper level transport winds producing haze over the Outlook area. New Oregon fire starts close to the Idaho border in combination with established incidents (Telephone, Whiskey Mountain Falls, and Crazy Creek) will keep most communities in the MODERATE. The Boulder and Wolf Creek fires continue to add acreage burned yet at a pace that will not greatly influence AQI in Cascade today. Expect MODERATE with some USG in that community.
