

# Smoke Outlook

## Southern Oregon

# 8/08 - 8/09

Issued by [Wildland Fire Air Quality Response Program](#) on August 08, 2024 at 07:49 AM PDT

### Special Statement

Air Quality Advisories have been issued by Oregon Department of Environmental Quality, see [the Oregon Smoke Blog](#) for details. For additional Smoke Outlooks issued in the region, as well as the latest air quality information, see [the AirNow-Fire and Smoke Map](#).

### Fire

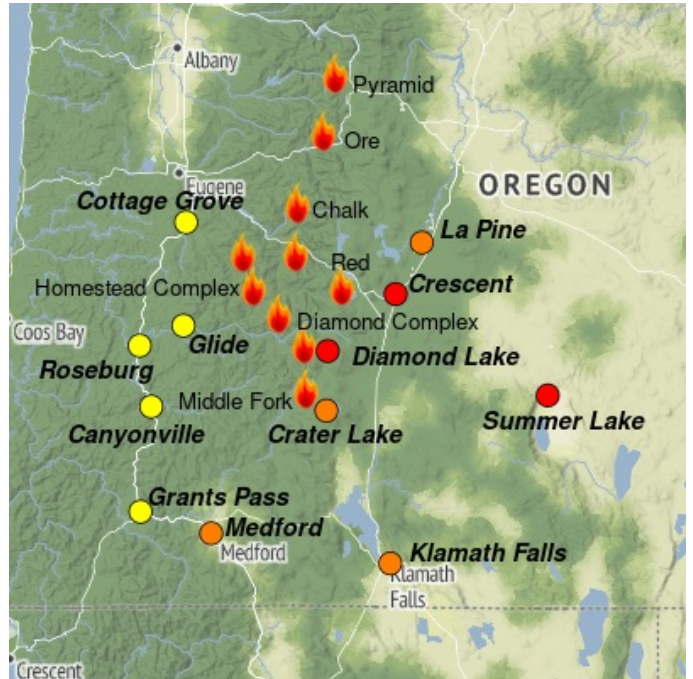

Numerous fires are actively burning within the Cascades. Note some fires are being managed within a complex, such as the Homestead and Diamond Complexes. For the latest fire information, see <https://inciweb.wildfire.gov/>

### Smoke

Heavy smoke will continue to impact communities along Highways 138 and the 97 corridor. Overall air quality will be USG to UHEALTHY, potentially reaching HAZARDOUS levels at times. Smoke could also reduce visibility, particularly along Hwy 138, so care should be taken when traveling between Glide and Diamond Lake. Communities along the I-5 corridor should see mostly MODERATE air quality and very hazy skies.

### Are You Staying Smoke Ready?

Give yourself some reminders by checking out Oregon Health Authority's [Prepare for Wildfire Smoke](#) page, for tons of information that you can use to protect your health.

Daily AQI Forecast\* for Thursday

Station	Yesterday			Wed 8/07	Comment for Today -- Thu, Aug 08	Forecast*	
	6a	noon	6p			Thu 8/08	Fri 8/09
Roseburg					GOOD to MODERATE air quality, haze, and potential periods of smoke		
Cottage Grove					Mostly GOOD to MODERATE air quality, haze, with periods of smoke		
Crater Lake					Mostly USG air quality with periods of heavy smoke.		
Canyonville	No hourly data				Mostly GOOD to MODERATE air quality, haze, and potential periods of smoke		
Klamath Falls					USG/UNHEALTHY air quality with periods of heavy smoke possible		
Medford					UNHEALTHY air quality should improve to MODERATE, haze, and periods of smoke
