

# Smoke Outlook

## Southern Oregon

8/22 - 8/23

Issued by [Wildland Fire Air Quality Response Program](#) on August 22, 2024 at 07:10 AM PDT

### Special Statement

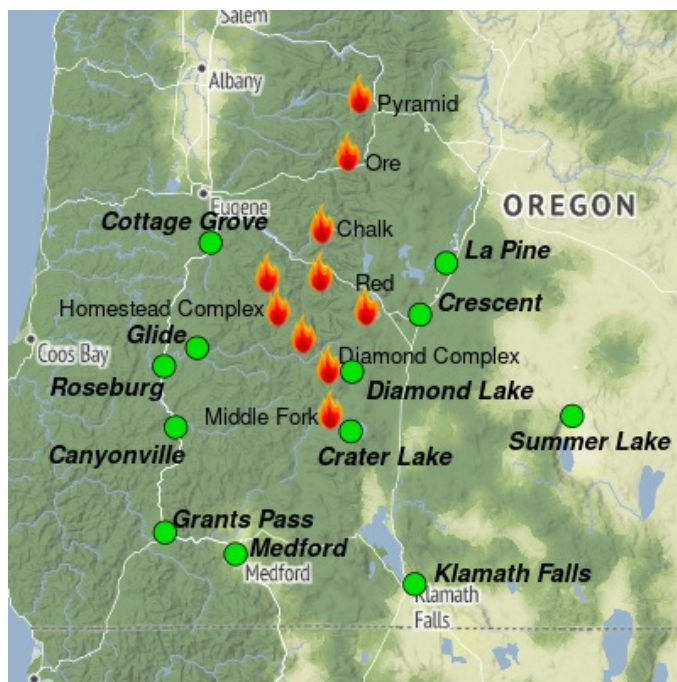

**No** Air Quality Advisories for the forecast area: see [the Oregon Smoke Blog](#) for future advisories. Additional Smoke Outlooks and updated air quality information are at [the Fire and Smoke Map](#).

### Fire

The multiple fires burning within the Cascades remain quiet since last weekend's rain. Fire crews are working on fire line construction, patrolling, mop up of hotspots, and other suppression activities during this relatively quiet time. The Middle Fork Fire, Homestead and Diamond Complexes continue to show hot spots which could lead to increased fire activity as fuels dry next week, but no significant growth is expected with cooler temperatures, increased humidity, and chance of rain forecasted Thurs to Sat. The latest fire information is at [Inciweb's Wildfire Information](#).

### Smoke

Smoke impacts continue to be low. **GOOD** air quality expected for the forecast area, but drying of fuels next week could increase fire activity and smoke production. Predicted rise in humidity and chance of rain Thurs to Sat will dampen fire activity and smoke production again. Areas nearest the fires and east of the Cascades will continue to see relief for a few days, and visitors to Diamond and Crater Lakes can expect no smoke impacts. The I-5 corridor continues in **GOOD** for the next few days.

Daily AQI Forecast\* for Thursday

Station	Yesterday hourly			Wed 8/21	Forecast* Comment for Today -- Thu, Aug 22	Thu 8/22	Fri 8/23
	6a	noon	6p				
La Pine				●	Overall GOOD conditions today. Light haze from fires in the area may be present	●	●
Medford				●	GOOD air quality again. Little to no smoke continue.	●	●
