The Miners Complex consists of eight wildfires caused by lightning strikes in the Mt. Baker-Snoqualmie National Forest. The fires included in the complex are Miners Fire, Vista Ridge Fire, Dolly Creek Fire, Sulphur Three Fire, Sulphur Four Fire, Sulphur Thirty-Four Fire, Plummer, and Middle Ridge Fire.

Update: Rainfall last evening and overnight continued the trend of minimal fire activity on the Miners Complex fires. A Forest Service engine from Arizona has arrived and will begin patrolling the fires. A flight reconnaissance has been requested to ascertain the scope of the fire.

Weather: Showers are to linger today in the wake of a weak front. Can't rule out a slight chance (15%) of thunderstorms near the incident site also. An upper-ridge will build across the region starting tonight as warmer and drier conditions leads into the second half of the week. Weak offshore flow may also set up during this time along with unstable conditions. High temperature around 62 with cloudy skies becoming partly sunny.
