Tuesday, September 17, 2024

Northern Rockies Team 2, Incident Commander Scott Schuster

Location: 7 miles SW of Togwotee Pass

Start Date: Friday, August 16, 2024

Cause: Lightning

Size: 25,009 acres

Percent complete: 69%

Resources: 374 Total Personnel: 9 Hand Crews; 7 Engines; 13 Heavy Equipment; 1 Helicopter

KEY MESSAGES:

The fire continues to smolder in heavy timber, litter, dead and down timber, and younger mixed conifers. Minimal fire behavior is expected. Creeping, smoldering, and backing behavior of the fire will continue with an occasional single tree torching.

Firefighters and heavy equipment will continue to work in the Highway 26/287 corridor. Please drive with caution. Public and firefighter safety continues to be our highest priority on the Fish Creek Fire.

The Bridger-Teton and Shoshone National Forests updated the Closure Order for the area of the fire on Sept. 12th. These closures provide for public and firefighters safety. Please respect closed campgrounds and trails. Additional information regarding the current closure order can be found in the Forest websites.

CURRENT STATUS:

Firefighters took advantage of the favorable weather conditions over the last few days allowing for very productive shifts. Crews have continued repairing some of the disturbance caused by suppression efforts, minimizing potential soil erosion, along Deception Road from Highway 26 to Brooks Lake Lodge campground. Firefighters will continue to monitor fire behavior in the area for potential threats to the HWY 26 and other critical values.

Firefighters have made great progress on the fuels mitigation project around the structure of Togwotee Lodge. The cutting phase is complete and now removal of vegetation debris will proceed. This action will reduce the ability of the fuels to feed any fire incursion and will improve defensible space for values at risk from future wildfires.

Numerous hazards will remain in the fire area, however. Many dead trees with fire weakened roots abound, creating a fall hazards. Steep slopes that no longer have small vegetation holding soil in place can create landslide hazards as well. This is why we ask that closure areas be respected.

WEATHER AND FIRE BEHAVIOR:

The area of the Fish Creek Fire has received a significant amount of moisture across the fire zone over the last week. Forecast is for rain today, starting in the evening through late Wednesday. This period is likely to bring wetting rainfall that should further reduce fire activity.

AIR QUALITY AND SMOKE:

Aside from continued smoldering and isolated torching, the fire footprint is putting up minimal smoke. For up-to-date air quality alerts, current and predicted smoke conditions and ways to mitigate poor air quality, check out the AirNow website at <https://www.airnow.gov/>.

CLOSURES AND EVACUATIONS:

The joint Closure Order issued by both the Bridger-Teton and Shoshone National Forests for the fire area, remains in effect. Please do not enter the closure area or use any Forest Roads that are closed. For specific details regarding this closure, please reference the map at [Fish Creek Area, Roads, and Trails Closure Order \(map\)](#) and the Forest closure order [fseprd1204904.pdf \(usda.gov\)](#).

Under the jurisdiction of Fremont County, the areas of Brooks Lake, Pinnacle Drive and Breccia Drive remain at Level 2 "Set" Status (indicated by yellow blocks on the PIO Incident Map). A Level 2 "Set" Status means residents should be ready to evacuate at a moment's notice. If the Level 2 Set notice changes back to a Level 3 "Go" notice, residents must evacuate until advised otherwise by Fremont County. See the alert notice on the [Fremont County Fire Protection District Facebook page](#).

The Teton County Division of Emergency Management utilizes a Ready, Set, Go system for evacuation messaging, visit their website for additional details at www.tetoncountyyw.gov/1846/Ready-Set-GO. (Indicated by green blocks on the PIO Incident Map.) They advise all residents to be in a "Ready" status by preparing for evacuations and becoming fire adapted. All residents are encouraged to sign up for Teton County, Wyoming's free alert and warning service, Teton WY Alerts at: [Teton WY Alerts - Sign Up \(everbridge.net\)](#).

US HWY 26/287 is open for free-flowing traffic. Motorists may still experience smoke and sometimes limited visibility. A 45-mph speed restriction remains in effect for the fire area. Motorists are encouraged to stay alert for fire personnel and fire vehicles and use caution when travelling through the area.

The Wyoming Department of Transportation (WYDOT) continues to work closely with Fremont County Emergency Management, Fremont County Sheriff's Office and fire officials for the safety of motorists and firefighters.

Drivers are encouraged to visit <https://www.wyoroad.info/> prior to traveling on US HWY 26/287 for road status and information, or download the **Wyoming 511** app at <https://www.wyoroad.info/511/WY511Mobile.html> to monitor for any changes due to fire activity.
