Leader’s Intent: The Boise Fire is being managed with a full suppression strategy.

Operational Update: Crews continue to make progress securing the active flanks along the eastern edge of the fire. Along the western flank, resources are conducting suppression repair and monitoring for any potential threats to the line. Snagging operations are in full swing improving safe passage on interior roadways for crews making access. Firefighter safety is top priority with the continued work being completed in steep terrain. Air assets are being utilized for water dropping and cargo missions as needed. Resource and cultural advisors continue to direct and coordinate suppression repair efforts around the area of China Creek which includes, creating water bars and repairing hand and dozer lines.

Weather and Fire Behavior: Sunday will provide a slight change in weather patterns with a 5-10 degree decrease along with an RH 40-45%. SSE winds will be prominent in the AM hours at a rate of 15-20 mph with gusts up to 25. On shore flow will prevail in the afternoon, providing 15-20 mph winds from the SSW. Crews are making progress and are attending to the active areas on the eastern flank. No significant fire spread is expected.
