

Smoke Outlook

NW Oregon Willamette Complex

9/29 - 9/30

Issued by [Wildland Fire Air Quality Response Program](#) on September 29, 2024 at 07:59 AM PDT

Special Statement

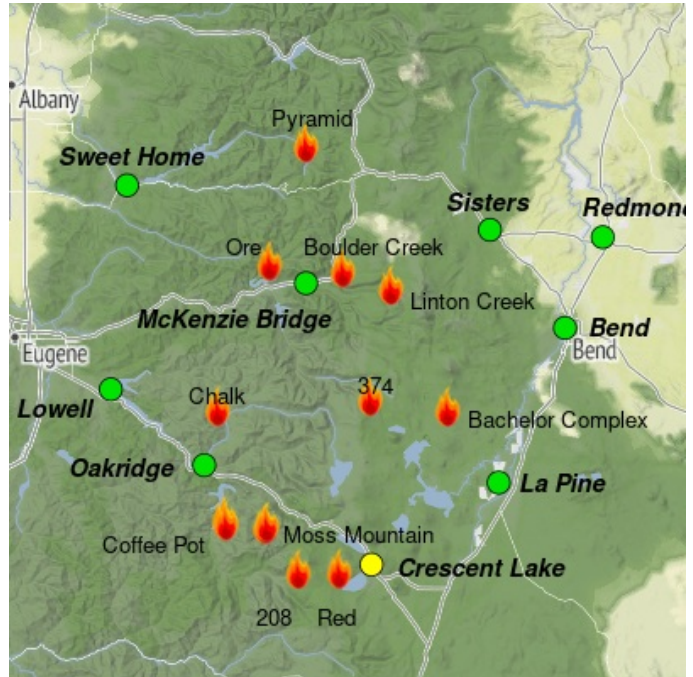

This is the final Smoke Outlook for the Willamette Complex and Red until further notice. Please visit [Oregon Smoke Information](#) and your local air quality management district for air quality forecasts and advisories.

Fire

The Red Fire is the most active fire being managed within the complex. Fire behavior should be limited to smoldering and creeping with small areas of open flame on the Red Fire. Multiple fires remain active to the east, west, and south of the forecast area and are predicted to bring intermittent smoke impacts. Crews continue working on road repairs, patrolling, mop up of hotspots, and other suppression activities. Recent cooler temperatures and higher humidity helped with fire suppression efforts, but smoke production may increase if fire activity increases with upcoming warmer and dryer weather. The latest fire information is at [InciWeb](#).

Smoke

Similar to yesterday, air quality is predicted to be mostly GOOD for the forecast area. The next few days will be great for getting outside. Smoke from fires to the east, west, and south may move into communities for brief periods of time. Crescent Lake continues to see MODERATE smoke impacts from the Red Fire. Smoke production may pick up as fuels dry in the warmer weather and if fire activity increases starting the week of Sept 30. For near real-time air quality information, see the [Fire and Smoke Map](#).

Daily AQI Forecast* for Sunday

Station	Yesterday hourly			Sat 9/28	Comment for Today -- Sun, Sep 29	Forecast*	
	6a	noon	6p			Sun 9/29	Mon 9/30
Sweet Home	[Bar chart showing AQI fluctuations]			●	GOOD air quality expected to continue for next few days.	●	●
McKenzie Bridge	No hourly data			●	GOOD air quality expected to continue for next few days.	●	●
Lowell	No hourly data			●	GOOD air quality expected to continue for next few days.	●	●
Crescent Lake	No hourly data			●	Mostly GOOD to MODERATE continue due to smoke from Red Fire.	●	●
