

Rail Ridge Fire October 18, 2024

Fire acres: 176,383 | Total Personnel: 561 | Percent Containment: 89%

In addition to repair work, fire crews continue to prioritize fire suppression, mop-up, and patrol where necessary.

Heavy repair work continues throughout the fire footprint, with firefighters prioritizing their work to be the most effective given the weather and ground conditions. Most of the repair work will be in the south due to muddy roads in the north.

Although the weather conditions have decreased fire activity and fire suppression operations, there is still an immense amount of rehab work to be done on the Rail Ridge Fire. Hundreds of miles of containment and contingency line was built during initial suppression efforts that need to be repaired.

High pressure in the region today and Saturday will result in clear skies and temperatures warming from below normal today to near to slightly above normal over the weekend.
