### FIRE SUMMARY OCTOBER 7, 2024

The Central Idaho Dispatch Zone is at **HIGH** Fire Danger

**Salmon, Idaho- October 7, 2024-** There have been no new fires reported on the Salmon-Challis National Forest since the last update on Monday, September 30, 2024. To date, there have been 64 wildfires reported on the Salmon-Challis National Forest. 53 of the fires have been declared out.

Mowitch (September 29): is approximately three (3) miles north of Indian Creek on the Middle Fork Ranger District in the Frank Church River of No Return Wilderness. The 993 acre fire is burning in grass, brush, spruce, fir, and ponderosa pine. The fire can be found on InciWeb at <https://inciweb.wildfire.gov/incident-information/idscf-mowitch-fire>.

Nugget (September 13): is located approximately 40 miles west of Salmon on the North Fork Ranger District in the Frank Church River of No Return Wilderness. The 994 acre fire is burning in fir. The fire is surrounded by and in fire scars from 2005, 2013, and 2015. Fire managers are recommending the public do not enter the Nugget and Cradle Creek drainages. The fire can be found on InciWeb at <https://inciweb.wildfire.gov/incident-information/idscf-nugget-fire>.

Garden (September 8): is located approximately two (2) miles southwest of the confluence of Panther Creek and the Main Salmon River on the North Fork Ranger District in the Frank Church River of No Return Wilderness. The fire is approximately 7,186 acres burning in grass, brush, and timber. The fire is being managed by a local Type III organization and is being reported separately. The fire can be found on InciWeb at <https://inciweb.wildfire.gov/incident-information/idscf-garden-fire>.

Vanity (September 3): is located approximately 42 miles west of Challis on the Middle Fork Ranger District. The approximately 600 acre fire is burning in subalpine fir and is surrounded by the 2012 Halstead Fire. Fire managers are using a point protection strategy (a wildfire response strategy, which protects specific assets or highly valued resources from the wildfire without directly halting the continued spread of the wildfire) to minimize exposure to fire personnel while protecting identified values. Specific values potentially threatened with this fire include Forest Service infrastructure. The fire can be found on InciWeb at <https://inciweb.wildfire.gov/incident-information/idscf-vanity>.

Red Rock (September 2): is located approximately two (2) miles east of Yellowjacket Guard Station on the Salmon-Cobalt Ranger District. The Red Rock Fire experienced extreme fire behavior on October 4 due to the passing wind event with gusts up to 56 miles per hour recorded. The Black Eagle fire merged with the Red Rock Fire. The combined fire is now known as the Red Rock Fire and is being reported as such. A Type III Incident Management Team is managing the fire and information is being reported separately. The fire can be found on InciWeb at <https://inciweb.wildfire.gov/incident-information/idscf-red-rock-fire>.

Reynolds (August 22): is located approximately 21 miles northwest of Indianola, approximately 5.5 miles northwest of Horse Creek Hot Springs Campground on the Idaho/Montana border. Fire is estimated to be approximately 2,671 acres burning in spruce and fir. The Bitterroot National Forest is lead on this fire.

Birch (August 17): is located on the west side of the Middle Fork of the Salmon River on Norton Ridge on the Middle Fork Ranger District in the Frank Church River of No Return Wilderness. The 13,274 acre fire is burning in subalpine fir. The fire is surrounded by the 2022 Norton Fire and fire scars from the fires of 2000. The fire can be found on InciWeb at <https://inciweb.wildfire.gov/incident-information/idscf-birch-fire>.

Greyhound (August 11): is located approximately 46 miles northwest of Challis on the Middle Fork Ranger District. The 97 acre fire is burning in subalpine fir and lodgepole pine on the edge of the 2021 Boundary Creek Fire. Firefighter and public safety is the number one priority for the Greyhound Fire. During initial size up for the fire, several safety concerns were identified including: the remote location of the fire, steep and inaccessible terrain, heavy dead and down fuels with a substantial snag component, private property and associated mining infrastructure, and lack of safe ingress and egress for firefighters. Fire managers will be monitoring the fire with reconnaissance flights and lookouts.

Black Eagle (August 5): is located approximately 12 miles west of Forney on the North Fork Ranger District in the Frank Church River of No Return Wilderness. The Black Eagle Fire experienced extreme fire behavior on October 4 due to the passing wind event with gusts up to 56 miles per hour recorded. The fire grew to the northeast and merged with the Red Rock Fire. The combined fire is now known as the Red Rock Fire and is being reported as such. A Type III Incident Management Team is managing the fire and information is being reported separately. The fire can be found on InciWeb at <https://inciweb.wildfire.gov/incident-information/idscf-red-rock-fire>.

--MORE--

Wapiti (July 24): started on the Boise National Forest, burned onto the Sawtooth National, and around August 24<sup>th</sup> burned onto the Salmon-Challis National Forest. A Complex Incident Management Team is managing the fire. Information can be found on InciWeb at <https://inciweb.wildfire.gov/incident-information/idbof-wapiti-fire>.

Thunder (July 24): The lightning fire is located approximately two (2) miles northwest of Williams Lake and approximately 12 miles southwest of Salmon. The fire is 100% contained and controlled, fire size is estimated to be 2,474 acres and is burning in timber, sagebrush, and grass.

**Weather:** Weak westerly flow today will keep skies clear and continue the warming trend, although afternoon humidity should change little. A very weak low will shift wind to more southwesterly starting tonight. This will bring in more cloudiness, but the chance for precipitation is still nearly zero. Wind should peak on Wednesday afternoon with the low passing to the east, bringing slightly colder air for Thursday.

The forest is asking visitors to be aware of the **HIGH** fire danger for the Salmon-Challis National Forest. Ensure your campfire is dead out. If it is too hot to touch, it is too hot to leave! One Less Spark Means One Less Wildfire. Since June 1, Forest employees have found and extinguished at least 13 abandoned campfires.

Nationally, there are 27 uncontained large fires being managed under a full suppression strategy and 16 large fires managed under a strategy other than full suppression.
