

InciWeb News Article—Boise NF Post-Fire BAER Assessment

BAER Specialists Assess Trail Creek Hot Springs-an Undeveloped Recreation Site within the Snag Fire Perimeter

BAER Hydrologists Tracy Weddle and Connor Gallagher-recently assessed the Trail Creek Hot Springs, an undeveloped recreation site within the Snag Fire burn area for impacts associated with increased post-fire flow potential and sudden increase in stream level rise including floatable woody debris production, and hazard trees for safety by users of the site.

NOTE: See related photos to this article under the “Photos” Tab on this Boise NF Post-Fire BAER InciWeb page: [ldbof Boise Nf Postfire Baer 2024 Information | InciWeb \(wildfire.gov\)](#). Also see “Related Information” PDF article document containing related article photos below.

BAER SAFETY MESSAGE: Everyone near and downstream from the burned areas should remain alert and stay updated on weather conditions that may result in heavy rains and increased water runoff. Flash flooding may occur quickly during heavy rain events—be prepared to act. Current weather and emergency notifications can be found at the **National Weather Service:** www.weather.gov/boj/.
