

SHOE FIRE DAILY UPDATE October 28, 2024

Email: 2024.shoe@firenet.gov

Incident Website: <https://inciweb.wildfire.gov/incident-information/cashf-shoe-fire>

Forest Website: <https://www.fs.usda.gov/stnf>

Fire Weather Forecast: <https://www.weather.gov/wrh/CAFW?area=ECC005>

Fire Information Line: 530-338-0317 (Staffed 8:00 AM – 8:00 PM)

Quick Facts:

Location: Shasta County, CA | **Start Date:** Wednesday, October 9, 2024, at 6:57 PM | **Cause:** Human
Size: 5,124 | **Containment:** 65% | **Vegetation:** Timber, Chaparral | **Total Personnel Assigned:** 767

Diligent mop-up operations, rain showers, and cooler temperatures all contributed to another increase in containment on the fire. Yesterday the fire area received up to a quarter-inch of rainfall. Much of the fire perimeter has been thoroughly secured and firefighters removed additional hose and water handling equipment from the line where it was no longer needed. Excavators are engaged in fire suppression repair along Garden Ridge, scattering cut vegetation over the soil and constructing water bars to promote proper drainage and prevent erosion. Dozers also are installing water bars along mechanically constructed control lines elsewhere on the fire. Additional heavy equipment resources have moved into place to further fire suppression repair efforts. Resource Advisors are coordinating closely with fire managers to identify and examine repair work to mitigate impacts from suppression operations on natural and cultural resources. Chipping, masticating, and grading operations are ongoing around the fire area. Crews are working to clean debris out of culverts, helping to avoid road damage from rains and water runoff. Firefighters continue to monitor and patrol, ready to take action if any smokes are observed near containment lines and resources remain available to assist with any new fire starts in the area.

WEATHER: Scattered showers are forecast today. Temperatures will be very similar to yesterday, with highs mainly in the 50s. Winds are expected to be southwest-west 5-10 mph with gusts to 15 mph. More precipitation is anticipated within the coming week.

SMOKE: Updates on smoke conditions can be found at the following link:
