---

**Location:** 8 miles east of Helmville, MT, 0.5 miles north of Nevada Lake

**Start Date:** 10/14/2024

**Cause:** Escaped Prescribed Burn

**Size:** 208 acres

**Containment:** 0%

124 Total Personnel; 12 Engines; 2 Helicopters; 2 Hand Crews; 4 Heavy Equipment

### CURRENT STATUS

The Nevada Lake Fire is currently 208 acres and actively burning in open grass and heavy timber on the Fish, Wildlife and Parks (FWP) Nevada Lake Wildlife Management Area (WMA) and private land east of Helmville, Montana. The wildfire is the result of a FWP escaped prescribed burn ignited on Monday, October 14, north of Nevada Lake on the WMA. The burn was declared a wildfire when the prescribed fire escaped containment lines. The DNRC is managing the wildfire response.

On Wednesday, October 16, resources completed line construction around the majority of the fire perimeter and began "mop up" operations, or extinguishing all heat and hot spots close to the line to better secure it. Today, efforts will focus on building control line and reinforcing existing control line, with helicopters providing air support as needed. The fire remains at 0% containment, with containment measuring how much of the fire perimeter has been surrounded by control line that managers are confident fire will not progress across.

Several days of work are anticipated to secure unburned areas of fuel within the fire perimeter and complete mop-up operations in burned sections near the control lines.

### WEATHER AND FIRE BEHAVIOR

Today, the area will receive scattered showers and cooler temperatures due to a low-pressure system. There is a 20 percent chance of wetting rains with 5-15 mph winds out of the west. High pressure will build back over the area Friday and into the weekend allowing for gradual warming and drying conditions. More shower activity is expected for Monday.

### EVACUATIONS AND CLOSURES

There are no evacuations or closures, but the public is asked to avoid the area. Area residents should be vigilant and remain prepared. For updates, visit <https://inciweb.wildfire.gov/incident-information/mtmts-nevada-lake-fire> and monitor the Powell County Sheriff's Office Facebook page.
