

Smoke Outlook

NE Utah Yellow Lake

10/13 - 10/14

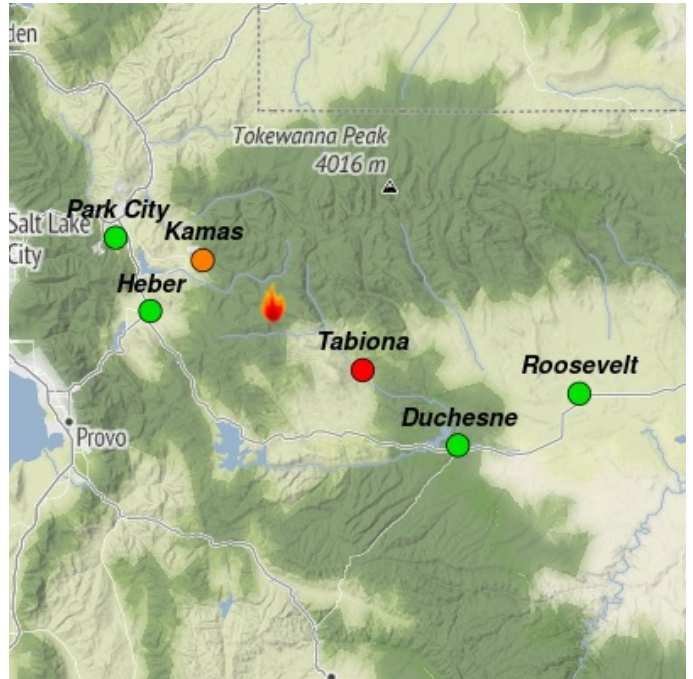

Issued by [Wildland Fire Air Quality Response Program](#) on October 13, 2024 at 08:25 AM MDT

Fire

The Yellow Lake Fire is currently 23% contained. A full suppression effort continued Saturday using ground crews and support from numerous aircraft. The north and east sides of the fire remained most active and are the current priorities. Firefighters continue to hold the progress that's been made.

Smoke

Smoke from fire activity yesterday settled in overnight and raised air quality levels in areas downwind of the fire. Those areas will continue to see a pattern of smoke clearing out through the day and settling in during the evening and overnight. Cloud cover and southeast winds are expected over the fire today.

Daily AQI Forecast* for Sunday

Station	Yesterday	Sat 10/12	Comment for Today -- Sun, Oct 13	Forecast*	
	hourly			Sun 10/13	Mon 10/14
