

Smoke Outlook

Northwest Wyoming - Pack Trail Fire

10/27 - 10/28

Issued by [Wildland Fire Air Quality Response Program](#) on October 27, 2024 at 08:08 AM MDT

Fire

The fire has burned 89,921 acres. Fire behavior on most of the fire will be limited to the smoldering of large down and dead fuels. With warmer and drier air, some of the spots that still have heat will transition from smoldering to small areas of surface fire and isolated torching. Little to no progression is expected.

Smoke

Continuing low amounts of smoke as large dead and down fuels smolder. Most of the smoke comes from the portion of the fire in the Gros Ventre valley. All sites, except Grand Teton Park HQ, should have GOOD air quality all day. The park HQ will have an average air quality of GOOD with a period of MODERATE possible late morning to midday as smoke moves down the Gros Ventre valley into the park. Smoke will be noticeable to visitors even if the air quality remains GOOD all day. The smoke should only affect the portion of the park near the mouth of the Gros Ventre valley.

Daily AQI Forecast* for Sunday

Station	Yesterday			Sat 10/26	Forecast*	Sun 10/27	Mon 10/28
	hourly						
	6a	noon	6p		Comment for Today -- Sun, Oct 27
