

Horseshoe Fire Update

Saturday, November 23, 2024 at 7:00 p.m.

inciweb.wildfire.gov/incident-information/cainf-horseshoe-fire-2024

Fire Size: approximately 3,000 acres at 0% containment

Personnel: approximately 700

Location: approximately 7 miles southwest of Lone Pine, California

Start date: October 30, 2024

Cause: undetermined

Unified Command agencies: U.S. Forest Service, CAL FIRE – BDU, Inyo County Sheriff, Lone Pine Fire Protection District

Current Situation:

The Horseshoe Fire exhibited moderate to high intensity behavior due to the erratic and strong winds, at times gusting in excess of 65 miles per hour. Despite these conditions, firefighters were able to make great progress in constructing containment lines on the north, east, and south flanks of the fire. The steepest elevations along the western flank continue to be the most active area of this fire.

Evacuations have not changed since this morning.

A helicopter worked to drop water where possible, but was grounded in the afternoon due to the high winds along with other air attack attempting to gain more intelligence on the fire's activity and size. Tomorrow morning air resources will attempt again with more favorable conditions in the forecast.

A damage assessment team has been ordered for this incident.
